Why Ideal Spa Plunge?

Comfort

40F-104F allowing you to have cold or hot water with a touch of a button, seating area with built-in armrests, our Dual spa plunge has a complete hot tub on one side and a cold plunge on the other to allow you to have the best of both worlds with comfort.

Quality

Built-in anti-freeze protection and auto defrost, titanium coil for long life, acrylic shell for easy cleaning and corrosion resistance, ABS bottom with toe kick to prevent moisture wicking, layered insulation and insulating cover for low energy cost, quiet operation with only 63.2 dB cooling and 59.3 dB heating. Stainless Steel frame for added strength and longevity.

Ease

Anti- spillover design to help prevent water loss when entering your plunge, easy access filter for easy cleaning and replacement, ozone for clean water, low profile for easy in and out, exterior bottom drain for easy and quick draining.

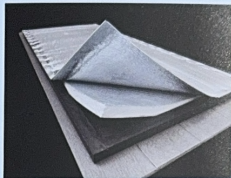

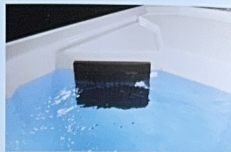

Cold water benefits:

- Change your life and Be Different.
- Improve Sleep and Mood
- Aid in muscle recovery and reduce inflammation.
- Reduce stress and anxiety, build mental resilience.
- Enhance circulation and promote faster recovery.
- Boost immune system and increase alertness.

Gallons:	120 G
Power:	115V
Purification:	Ozone
LED Light:	Included

Natural or Espresso

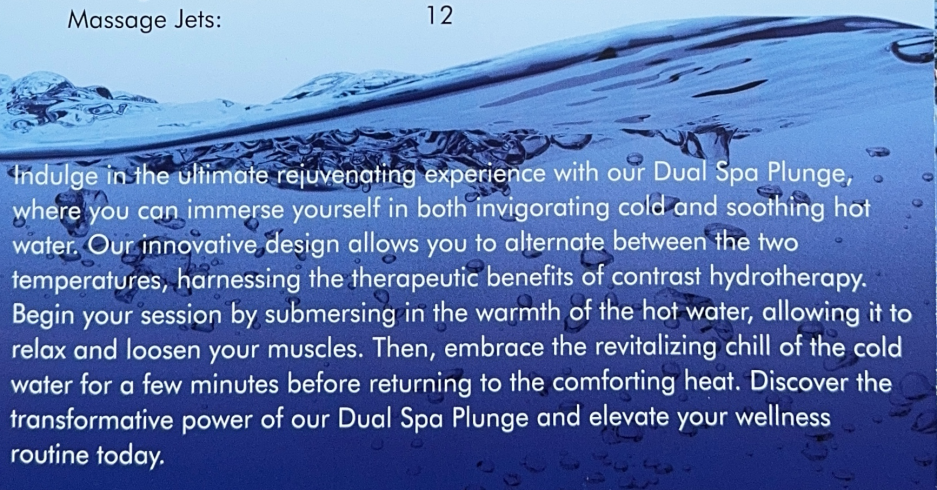

Our designs come from experience of using cold water therapy. From understanding how consumers use smaller bodies of water, to getting in and out of cold water, our designs make it easy to use your spa plunge. Why do we call ours a spa plunge instead of cold plunge? Unlike many others, our chillers can also heat, this allows you to go from cold to hot with a touch of a button.

Our Solo Plunge allows you to change the temperature from cold to hot and our Dual Plunge allows you to have both hot and cold simultaneously. Each Plunge chiller includes built-in auto defrost and anti-freeze protection.

Dual

Size:	85"x85"x30"
Weight:	750 LBS
Gallons:	120 G cold, 130 G Hot
Power:	115V x 2 or 220 15 amp
Purification:	Ozone

Massage Jets:	12

Indulge in the ultimate rejuvenating experience with our Dual Spa Plunge, where you can immerse yourself in both invigorating cold and soothing hot water. Our innovative design allows you to alternate between the two temperatures, harnessing the therapeutic benefits of contrast hydrotherapy. Begin your session by submersing in the warmth of the hot water, allowing it to relax and loosen your muscles. Then, embrace the revitalizing chill of the cold water for a few minutes before returning to the comforting heat. Discover the transformative power of our Dual Spa Plunge and elevate your wellness routine today.
